SCAN SUITE 8

SCAN CT - PROFILE AND 3D ANALYSIS SOFTWARE

SCAN CT is a software package for measuring and analyzing 2D profiles and 3D raster maps. It offers complete 2D and 3D surface measurement parameters as well as sophisticated filter and compensation methods. All combined in an operator friendly user interface.

2D PROFILE MEASUREMENTS
- Step Height (avg., max. and min. height)
- Flatness and Warpage
- Width and Length
- Cross Section Area
- Angle, Radius, Contour Analysis

Define base line and measurement areas using reference and measurement cursors. Select analysis from dropdown menu.

3D COPLANARITY MEASUREMENTS
- 3D Height (avg., max. and min. height)
- Flatness and Warpage
- Coplanarity

Draw rectangle, round or polygon cursors to define base plane and measurement areas.

3D VOLUME MEASUREMENTS
- Volume (Cuts, Fills, Net Volume)
- Planar area
- Surface area

Measures cuts and fills and uses height threshold. Accurate areal and planar surface calculations.

PROFILE ROUGHNESS MEASUREMENTS
- DIN EN ISO conform Roughness Parameters
- Shape Removal Algorithm
- Abbott-Firestone Material Curve
- Histogram
- Tip Simulation for Non-Contact Systems

Advanced roughness analysis, even on round or angled surfaces using shape compensation. Display waviness and roughness profile.

Profile analysis on a metal precision part

Height and Width
Measurement of a solar cell finger

Coplanarity
Measurement of a BGA Component

3D Surface
**3D ROUGHNESS MEASUREMENTS**
- New DIN EN ISO 25178 Parameters
- 3D Waviness Filters
- 3D Abbott-Firestone material curve, Histogram

Use advanced DIN /TS 16610 Filters. 3D Roughness Analysis even on warped or uneven surfaces.

**PARALLEL DATA COLLECTION**
- Parallel scanning with up to 4 sensors
- Collect Top, Bottom and Thickness data
- Average Thickness, Bow and Curvature
- Total Thickness Variation
- Parallel Intensity Masking

Graphical display of thickness maps and top/bottom surfaces

**2D AND 3D SURFACE COMPENSATIONS**
- 2D and 3D Polynom Fit
- Pre- and after measurements
- Areal Waviness Compensation

Surface compensation is only applied based on the data in the reference cursors.

**MORE FEATURES AND HIGHLIGHTS**
- x-, y-, z-data stitching capability
- Uni- / bi-directional scanning
- Linear, circular and ellipsoidal scanning
- Simultaneous data collection of up to 4 sensors
- Dedicated user management
- Up to 200 Mio. data points per raster
- Fast multithread technology

**SUMMARY**
SCAN CT is a complete, unique and easy to use surface analysis software. It offers outstanding features and includes the following highlights:
- Complete 2D and 3D surface analysis
- Profile and 3D roughness measurements according to DIN ISO EN Standards
- Comprehensive profile and surface compensations
- Advanced filter technologies
- Uni- / bi-directional scanning
- Linear, circular and ellipsoidal scanning
- Simultaneous data collection of up to 4 sensors
- Dedicated user management
- Up to 200 Mio. data points per raster
- Fast multithread technology
